The Firms Decree

Defining the process of establishing official Elevation companies

By this decree when an individual or a group of individuals want to establish any officially recognized organization it has to go through the process of a formal filing and approval. They need to correctly and faithfully fill out the registration form provided by our newly established Department of Industry and send it for an approval. When the approval is granted the organization becomes Elevation Registered Firm and has to include the abbreviated suffix „ , r.f. “ in its official name.

Elevation Registered Firms are currently not a subject of any taxation nor regulation, the process is in place to have an overview about all the organizations operating within Elevation's territory.

A reason for not granting an approval to an applicant is if the proposed organization operates in contradiction to the Constitution or laws.

Part of the Registration Form is to include the current logo used by the firm. A firm has to submit a new and updated Registration Form if their logo changes in the future, or if there are any other changes to the provided information. Such Form will go through an accelerated approval process. The reason for this is to keep track of the firms and their representation within Elevation, and to be sure they stay operating within the law.
